Design Edition

BATHROOM IDEAS

Established in 1987 and proudly New Zealand owned and family operated, Robertson import Europe's most innovative bathroom products.

Through our collection of brands, we deliver on our promise of breathtaking design and guaranteed quality, backed by industry-leading service and support to help realise your perfect bathroom.

This has never been more true than here, in our 2014 Design Edition. Every supplier featured in this collection has been personally selected for their unique designs and innovative technology. And more importantly, they have been chosen because they share Robertson's core values.

Like us, they strive to provide a package of products based around brand, quality and service. They are more than just our suppliers. The owners and long-term employees of these companies are our personal friends.

It is our privilege to represent them, and bring their designs to you.

Max Robertson

Managing Director

The Design Edition range of products are available from selected dealers nationwide. For more information visit our website.

Victoria + Albert Baths is a British brand with a worldwide reputation for creating beautiful luxurious, freestanding baths and basins.

As the ultimate statement in quality and style, their model line up is packed with inspirational free standing designs made from 100% QUARRYCAST®, a blend of volcanic limestone and high performance resins. Naturally white, each item is individually hand-finished by craftsmen.

There are three main collections in the Victoria + Albert Bath range, Classic, Contemporary and Premium, all offering a unique solution for your bathroom requirements, be it a small bathroom space or modern bathrooms.

victoria ⊕ albert®

*Volcanic limestone.
A superior long lasting alternative
to cast iron and acrylic.*

A naturally superior bath: It may sound obvious, but not all baths are created equally. British brand, Victoria & Albert, are passionate about their unique QUARRYCAST® material, made from a finely ground volcanic limestone and resin mix. As the stone-rich alternative to both cast iron and acrylic it is 100% one piece, hand finished and packed with naturally desirable properties.

Contoured to fit the body, Cabrits offers enhanced support for bathers of all sizes and is complemented by a low profile vessel basin. Its special 'double dip' design makes the bath one of the most comfortable available and, with a maximum volume of just 176 litres, also the most water efficient in the Victoria & Albert collection.

People often talk about quality and perfection.

But what do they really mean? To Windsor, it's about using nothing but the very finest materials and employing traditional, proven methods of production. Painstakingly hand-crafting every single piece, before subjecting it to rigorous, meticulous testing to ensure absolute excellence.

STYLE MODERNE

“For a life less ordinary”

Subtle but recognisable details from the era are strongly represented throughout the designs.

Discover the new Style Moderne Collection. A range inspired by the grace and glamour of the Art Deco age.

With tireless passion and unstinting commitment to creating the finest bathroom and architectural hardware fittings, Samuel Heath continues to employ time-honoured skills, combined with 21st Century technology.

Manufacturing in the heart of England since 1820, we have become renowned for our beautifully designed and intricately crafted bathroom fittings. Blending traditional skills with the very latest technology, we are creating distinctive designs for interior designers, architects and homeowners all around the world.

Retro Nouveau

The Retro Nouveau collection calls to mind unique and ancient classical traditions, but at the same time manages to be contemporary.

Each product is given its uniqueness by the skill with which it was created and above all by the care given to selected materials that compose it. Every detail has its importance and is executed with care and skillful attention.

Retro Nouveau design was created with different dynamics in mind. Emotional, formal, but also functional.

Each product has its own story and tells it in a friendly and rarefied atmosphere.

The various marbles used have been chosen for their strong concentration of fossils and as they are a purely natural product, there will always be the presence of different variations of veins, colours and shades, as well as micro-cracks and small holes. This gives each piece the characteristic of being truly unique.

Zucchetti's success story first began in a small foundry in Valduggia (in the province of Vercelli) set up by Alfredo Zucchetti in 1929. Today the Zucchetti Kos Group, led by the third generation, Elena and Carlo, with cousins Marco and Paolo Zucchetti, consists of 4 factories and a logistics centre covering a total of 72,000 square metres, employing 400 people and producing 2 million articles every year.

Zucchetti is often referred to as the Lamborghini of bathroom fixtures. Designers such as Matteo Thun, Paulo Barbieri, Barbara Sordina, Roberto and Ludovica Palomba, and Antonio Rodriguez have built a starkly sleek collection of sculptured bathroom faucets, bathroom fixtures, bathroom accessories, and kitchen faucets.

Savoy

A new collection of bathroomware that reinterprets the traditional two-handle mixer. With the ability to be customised by using different colours and logos for each cover, the range is designed with the hotel market in mind where there is an obvious need for clearly defined hot and cold taps.

Roberto & Ludovica Palomba

Blending the past with the future

Roberto & Ludovica Palomba, architects and designers, founded Palomba Serafini Associati in 1994.

Their distinctive hallmark has emerged from a capacity to combine a contemporary vision of society and user needs with an extensive knowledge of the historical and cultural roots of design, producing results that blend the past with the future.

This unique and personal approach makes them particularly sensitive to issues of function and the need to create long-lasting products, removed from the uniformity of momentary trends.

New design should improve on what exists.

It should respond to the highest demands of today's society, reflect a company's brand philosophy and the contemporary mood, all developed within an integrated and strategic vision.

Agorà

Agorà achieves the perfect equilibrium between past and present.

A "rediscovered" project reworked by Ludovica+Roberto Palomba. Classic in its inspiration, eclectic in its expression. A tradition that continues through innovation.

Discovering the old drawings in the archives and reworking them, keeping their original skin as a wrapping for today's technologies was like learning through study.

"Viewed without complexes and seen through the eyes of curiosity and humility, our past opens up a vision of eternal, truly important values. We looked backwards in order to look ahead with even more awareness."

Roberto & Ludovica Palomba

Soft

With Soft tap system, Ludovica & Roberto Palomba have managed to express their own concept of contemporary design which has developed out of the need to transform a technological, functional item into something that also contributes to the overarching architectural vision.

Boldly linear styling, softened by rounded forms, qualifies Soft as a luxury line that is both friendly and reassuring.

"A sculptural object with extensive flat surfaces whose mirror qualities reflect the light of a space; Soft draws its inspiration from the contemporary architecture of lofts and refers to the product with the same type of luminosity and contemporary charm."

Roberto & Ludovica Palomba

Jingle

In the Eighties, every home was familiar with Zucchetti's TV ad whose memorable jingle contributed to its popularity.

Today, in the same spirit, the mixer JINGLE is all set to conquer every home around the world: a familiar, pleasant, reassuring product created with over 80 years' all-Italian experience and industrial culture.

Harmonious proportions and an utterly contemporary look make JINGLE a sober and elegant product, for a sophisticated public that appreciates quality and practicality yet is in touch with the latest design trends and recognizes beauty at a glance.

"Compact and squared, with rounded corners, user-friendly, trendy, never aggressive, JINGLE is a young object in every sense. JINGLE is a modern project, because it's simple and immediate."

Harmonious proportions and a contemporary look make JINGLE a sober and elegant product, for a sophisticated public, ready to recognize beauty at a glance.

Roberto & Ludovica Palomba

Pan

"The Pan collection is our interpretation of the spare, cylindrical type of single lever mixer, which uses classical archetypes to develop aesthetics and new, completely original styles. We focused on connecting the vertical and horizontal elements. As in nature there are no cuts and welds, so the body of our faucet, designed like the trunk of a tree, creates the spout and the handle, using a gentle connection that is designed with exactly the same delicacy one would use in grafting a branch to a tree trunk."

"We wished Pan to have a freestanding collection. The involvement of space other than the walls of the bathroom has always been, we believe, one of the stylistic traits of our work. We desired, with this monolithic element, to continue our investigations into the relationship between the water elements and the architectural space. The new free-standing bath tub column is an item which seems to grow 'naturally' from the architecture."

"We wanted the functional elements to emerge organically out of pure geometric forms like their natural extensions, much in the same way a leaf issues forth from a branch and a branch from a trunk."

Roberto & Ludovica Palomba

Agorà

Soft

"Soft is a sculptured, sensual object with wide flat surfaces, which reflects the light from its surroundings like a mirror. Its design is inspired by the contemporary interior design of lofts and refers to the product with the same type of contemporary brilliance and appeal."

Bellagio

Bellagio is more than a simple tap, it is a way of viewing the bathroom as a place of refined elegance. It is a timeless element of the decor which confirms its metropolitan and contemporary personality in any environment.

"It is not retro, it is not the revival of a style - it is Bellagio, maybe even a stylistic "category maker". Bellagio is a woman, despite its masculine name. And if we were to describe her, she would undoubtedly be a cosmopolitan woman, cultured, refined, eclectic, vain and, above all ... beautiful!"

Matteo Thun

Thermostatic Shower & Mixer Program

For safety and comfort a thermostat provides the very best showering experience.

It allows you to preset a preferred showering temperature and then maintains that temperature for the duration of your shower without any perceptible fluctuations in temperature.

A good thermostat will have a built in safety feature to prevent accidentally raising the temperature above 38 degrees Celsius.

Thermostats can incorporate diverter valves that allow you to switch between outlets or have all outlets in use at the same time.

The various marbles used have been chosen for their strong concentration of fossils and as they are a purely natural product, there will always be the presence of different variations of veins, colours and shades, as well as micro-cracks and small holes. This gives each piece the characteristic of being truly unique.

The various marbles used have been chosen for their strong concentration of fossils and as they are a purely natural product, there will always be the presence of different variations of veins, colours and shades, as well as micro-cracks and small holes. AQUA AIR

AQUA AIR TECHNOLOGY

All Aquabella Hand Showers incorporate Aqua Air Technology. The air and water mix is a water saving feature that also provides superb flow performance that is both soft and invigorating during showering.

The 300, 200 and the 300 x 200 Vibrant Ultra Flat Showerheads also incorporate air technology. All Ultra Flat Showerheads also incorporate a flow device which helps to eliminate dripping after water closure, providing the showerhead is in a horizontal position.

PAN

Thermostatic Mixers

What are the benefits?

Safety

The principal benefit of a thermostatic valve over a normal tempering valve is that the reaction time is much faster.

Sudden changes or fluctuations in water supply or temperature can cause falls and scalding which is particularly high risk for children and the elderly.

Health

In commercial situations often a thermostatic valve is used to control the water temperature at the outlet rather than at the source. This, coupled with a Ring Main System, ensures the water temperature within the system can be maintained at a required temperature to prevent the conditions promoting legionella.

Economy

Efficiency of a thermostatic mixer = Saving on water and energy. No time is wasted adjusting the temperature whilst showering.

Comfort

Thermostats are a necessary element to a high-spec shower enabling you to enjoy the entirety of your shower at a consistent showering temperature. Switch the shower off and it will keep the exact temperature for next time. Thermostats also have the ability to keep multiple outlets at a consistent temperature.

So how does it work?

Temperature sensitive element which expands or contracts.

When the thermostatic element senses a temperature change, it changes the proportion of hot and cold being mixed.

Some thermostatic valves have thermoscopic capability which enables the valves to shut down in the case of cold or hot failure.

Installation Requirements

Water pressure to be:
Mains = 500KPA

Storage System:
Typical Hot Water Cylinder or Continuous Flow Hot water System with Storage.

Retrofit allowance – access to cavity required. Can be adapted to suit existing plumbed bathrooms.

Recommended installation by a certified plumber and supported by Robertson's dedicated After Sales Service Team.

Thermostatic Mixing Functions

CENTRAL THERMOSTAT

A single central thermostat is designed to control and adjust multiple outlets from a single source. Suitable for commercial use such as multiple hand wash basins or multiple showers, including elderly or disabled care facilities.

DIGITAL CONTROL THERMOSTATIC SHOWER VALVE

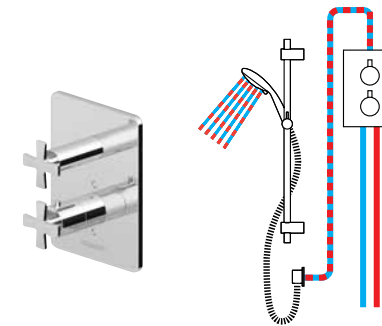

A thermostatic shower and digital wall mounted control panel is also available with minimum operating pressure of 1.5 bar.

THERMOSTAT WITH INDIVIDUAL STOP VALVES

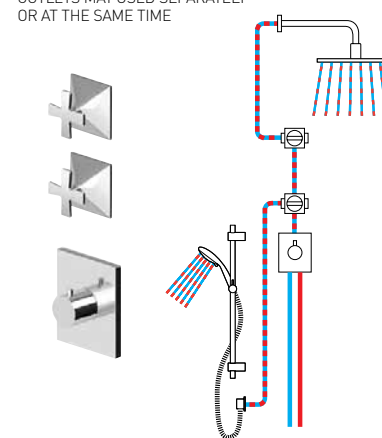

Incorporated diverter valves allow you to switch between various outlets, with the ability to have all outlets in use at the same time.

1 STOP VALVE TO CONTROL 1 OUTLET

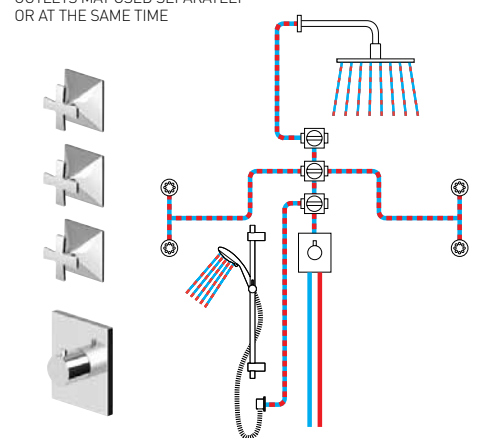

2 STOP VALVE TO CONTROL 2 OUTLETS

OUTLETS MAY USED SEPARATELY OR AT THE SAME TIME

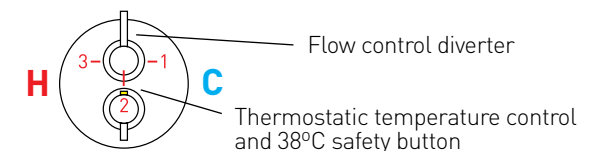

3 STOP VALVE TO CONTROL 3 OUTLETS

OUTLETS MAY USED SEPARATELY OR AT THE SAME TIME

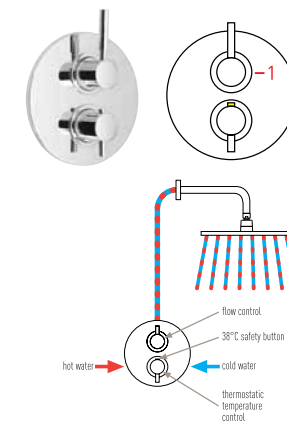

THERMOSTAT WITH DIVERTER

While the bottom lever manages temperature, the diverter can be set to send the mixed water to 1, 2 or 3 outlets. The water cannot flow from multiple outlets at the same.

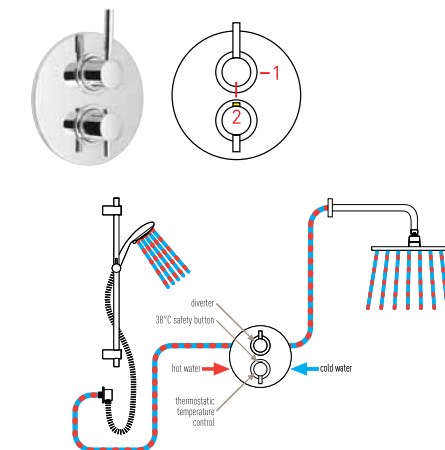

1 OUTLET

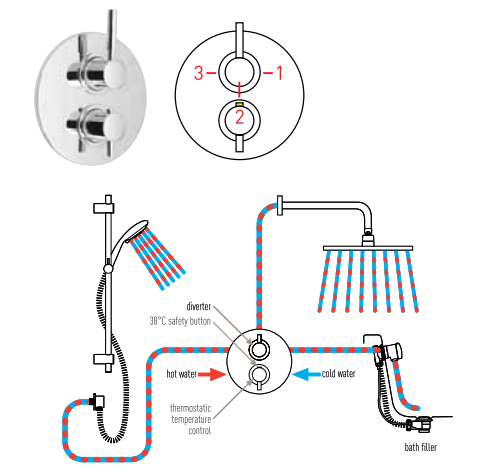

2 OUTLETS

OUTLETS CAN ONLY BE USED INDIVIDUALLY

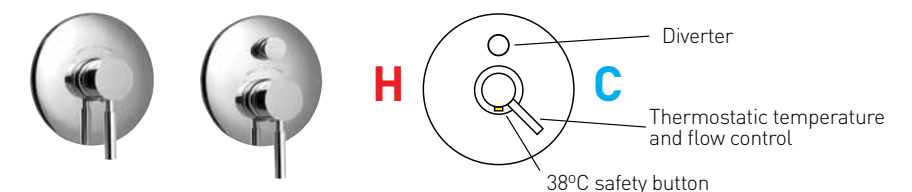

3 OUTLETS

OUTLETS MAY USED SEPARATELY OR AT THE SAME TIME

INTEGRATED THERMOSTATS

Axio-thermostatic mixers control the temperature and the flow all in a single lever. They are also available with diverter if required.

BAGNO CERAMIC BUTLER SINKS

The Ceramic Butler Sinks are individually hand-crafted and finished in fireclay. Cool and silky to touch, they have a hard non-porous surface giving excellent resistance to all commonly used chemicals and detergents and are extremely resistant to heat.

BAGNO TECH GRANITE SINKS

ALL BAGNO TECH GRANITE SINKS ARE DESIGNED TO OFFER ULTIMATE MATERIAL PERFORMANCE, YET ARE EASY TO CLEAN AND ARE RESISTANT TO NEARLY ALL HOUSEHOLD CHEMICALS

Resistance to Thermal Shock

Bagno Tec Granite sinks are designed and tested to withstand repeated cycles of hot and cold liquids without effect.

Impact and Scratch Resistant

Bagno Tec Granite sinks are designed to resist everyday knocks and bumps in the most hectic kitchen, without chipping or marking. This ensures that the finish of the sink and the cleaning benefits that go with it remain for the products life span.

Resistance to Chemicals

Bagno Tec Granite has an innovative, molecular structure that ensures all sinks are resistant to most commonly used household chemicals.

Resistance to Stains

The low material porosity denies staining agents the opportunity to penetrate the surface. Even the worst stains such as red wine and beetroot are easily wiped away with a cloth.

Water and Light Resistance

Bagno Tec Granite has been screened by world renowned colour laboratories – to ensure that Bagno Tec Granite sinks will not discolour in direct sunlight or water whiten over time.

MECHANICAL PUSH PLATES

When using the mechanical (pneumatic) option and installing the inwall cistern into a 90mm cavity. The push plate **HAS** to be installed remotely and clear of the tank. This will require an additional access panel for maintenance at least the same size as the cistern access portal. The cistern can be reversed so the maintenance panel can be in a different room or closet.

iPlate

A world of infinite combinations. With a simple gesture the buttons of the iPlate can be changed according to their own style.

The new control plate, iPlate, for in-wall flush cisterns unites functionality, practicality, performance, design and... creativity, with an infinite number of combinations and possibilities.

Available in a wide range of colours, iPlate becomes the expression of ones own personal style inside the bathroom thanks to the possibility of replacing the control buttons, creating infinite colour combinations with the buttons/plates.

Replacement is simple and rapid. iPlate proposes two different button kits, Elegance or Fantasy, to bring the bathroom in line with the users own personal style. The refined soft touch finish, available in white or black, gives the plate a look of exclusivity and appeal.

Robertron Architectural & Design Services

Here's how we can help...

By offering you New Zealand's widest range of European bathroom brands

If your customers are asking for it, chances are we have it. From entry-level convenience through to spectacular high-end design solutions, our product range is a fusion of innovative technology, inspirational design and outstanding quality. We cover high-end development projects including hotels, large apartment developments, commercial buildings and residential.

By providing the complete showroom experience for you and your clients

Robertson showroom creates a perfect atmosphere for any designer and architect along with their client wishing to put together specifications, examine a wide range of products and conceptualise ideas.

By working with you every step of the way

Our team of skilled and dedicated professionals bring a wealth of experience, creative ideas and troubleshooting to any project. Our involvement starts by offering relevant advice based on your situation and continues throughout the duration of the project with technical support.

By being responsible

Robertson responsibly sources products designed to lead the way in ecological, economical and safe water usage. The consistent improvement in our products and services ensures they will continue to meet all environmental, health and safety standards well into the future.

Our proven history

Our diverse portfolio covers an impressive number of prestigious projects across NZ and the Pacific having been leaders in the industry since 1987

DOLPHIN ISLAND

1984

Private Island

FIJI ISLANDS · SOUTH PACIFIC

DOLPHIN ISLAND, FIJI

This is stunning 14-acre private retreat re-joined sister properties Huka Lodge, New Zealand and Grande Provence Estate, South Africa in 2010, following an extensive period of renovation and refurbishment.

A private 14-acre island paradise, just a short cruise off Viti Levu, Fiji, surrounded by crystal-clear turquoise waters and wafted by warm sea breezes.

With superb accommodation for a maximum of eight guests, Dolphin Island is available on an exclusive-use basis. Beautifully appointed for every guest comfort, the island offers tropical living at its very best.

As every day blends seamlessly into the next, in this haven of romance and relaxation, guests experience all the magic of this truly superb retreat.

Project:

Dolphin Island
Fiji

Design:

Virginia Fisher

Products:

Ideal Standard White
Round Vessel Basin,
Victoria & Albert Ravello Bath,
Ideal Standard Melange Tapware

A contemporary architecture of the building, expansive views and considerable volume of the space with natural light flooding it through the glazed facade lent itself to yet another upmarket design of this high-end residential apartment by Space Studio

A simple base palette of white and warm greys were used throughout the apartment with contrasting dark accents in the joinery.

A combination of quality and predominantly natural finishes were used to give an underlying texture and pattern throughout the large spaces

Timber joinery and wall cladding is complimentary against harder tile and stone finishes. Finishes were selected for durability and ease of cleaning while still remaining elegant and sophisticated in nature.

New moods, new flair.

Un piccolo limbo privato, un luogo di decompressione, in cui anche le forme, eleganti e semplici hanno una funzione purificatrice.

A small, secluded paradise is a place where we can "decompress", where elegant, yet simple shapes have a purifying capacity.

ZUCCHETTI. KOS

After some more ideas?

Bursting with bathroom ideas, Issue 13 of our IDEAS brochure is a treasure trove of innovative product and great design.

New products in this issue include Multi Pressure Tapware by Ideal Standard, launched first in NZ and designed specifically for NZ water pressures incorporating IVT (Intelligent Valve Technology). Collections include Crisscross, Elliptic and Rotunda.

Also launched this issue are refreshed vanity collections featuring the latest trends and surface finishes from BESTWOOD and incorporating quality German Hettich drawer systems with Lifetime Warranty.

Bathroom IDEAS is also available as a FREE App. Just search for Robertson Ideas 13.
