ROBERTSON BATHWARE

BORN FROM A MIX OF GLOBAL EXPERIENCE AND LOCAL KNOWLEDGE

Two generations have grown the Robertson brand over its 35-year history. It is still proudly New Zealand and family owned by Max and Debbie Robertson, who founded Robertson Bathware in 1987. They've been joined over the years by son James, Sales Manager and daughter Kirsten, who has an eye for product design.

Since its earliest years, the company has followed a set of rigorous guidelines. Firstly, be innovative; create and supply products that are beautiful to look at, and simple and effective to operate. Secondly, always make the most of our team, both internationally and here in New Zealand. Finally, constantly develop technology and sustainable solutions to guarantee the quality of the products, services and consulting we provide.

We develop our products for the New Zealand market, but we search every corner of the world for inspiration and ways to improve and build on the product line. It might be the latest design trends from the Cersaie trade show in Bologna, Italy; the technical innovations found at ISH Germany; or the Kiwi ingenuity and superior craftsmanship we employ here on our own doorstep. It's all brought to the table to deliver a promise of breath taking design and guaranteed quality, backed by industry-leading service and support to help realise the perfect design.

OUR BRANDS

Designed and manufactured in Italy, the home of design excellence, combining traditional skills with advanced production techniques and high quality materials.

“
STYLES COME AND GO.
GOOD DESIGN IS A
LANGUAGE, NOT A STYLE.”

Massimo Vignelli / Italian Designer

➔ **FLAMINIA.**

Flaminia dedicates much of its energy to the development of solutions that can support and give shape to the creativity of the designers, as well as make it possible to realise highly complex projects. From minimal to organic and rational to artistic, these design styles are built on a feeling for the material and the skills of the company's expert Italian craftsmen.

ZUCCHETTI.

Italian brand Zucchetti is often referred to as the Lamborghini of bathroom fixtures. Over eighty years of experience and a commitment to constant innovation enables Zucchetti to continue to create iconic contemporary brassware collections, collaborating with industry notable designers such as Matteo Thun, Antonio Rodriguez, and Ludovica+Roberto Palomba resulting in many award winning design concepts.

alice

Founded in 1998 in Civita Castellana, Italy, Alice produces more than 100 pieces per day out of the Civita Castellana factory. The contribution of ideas and creativity manifests into products of great value with originality and passion. Deriving from a long standing tradition in ceramic processing that represents the cultural heritage of the region. Quality, innovation and a little bit of pride make Alice creations truly unique.

@GALASSIA

Born in 1980 in the Civita Castellana district of Italy, a renowned ceramic center, where craftsmanship, innovation, technology and sustainability blend together offering the best of Italian quality.

NOBILI

Technology and quality, the strengths behind the Nobili brand from the 1950s to the present day. They are the foundations through which they strive to produce landmark products dedicated to the bathroom and kitchen, combining environmentally-friendly, cutting-edge technology with Italian style.

OUR BRANDS

apaiser

Styled by nature. Perfected by hand. Apaiser bathware is globally recognised and coveted in the best hotels, resorts and residences. Each bathware piece is individually sculpted by master craftsmen. The Apaiser signature offering of Bath Couture® embodies complete customisation for those who dare to be different.

SAMUEL HEATH

Established in 1820, British manufacturer Samuel Heath combines exquisite materials with traditional crafting techniques to create understated style and refinement synonymous with contemporary British design.

victoria ⊕ albert®

The ultimate statement in quality and style and a global brand with a worldwide reputation for creating beautiful, inspirational baths made from Quarrycast®, a volcanic limestone material that is the naturally desirable stone-rich alternative to both cast iron and acrylic. Formed in 1996 with a passion for luxury bathing, Victoria + Albert Baths have been creating iconic pieces for over 20 years.

OLI

Using patented technology and high quality manufacturing standards, OLI creates products that have, on a global scale, changed the daily experience in the bathroom, making it more efficient, environmentally friendly, comfortable and accessible.

ELEMENTI®

Born from decades of experience and shaped by the latest international design trends, the Elementi brand creates bathroom elements with both innovative functionality and visual beauty. The Elementi range of bathroom solutions are designed to complement each other and create a satisfying aesthetic balance and harmonious bathing experience.

PARISI

Parisi's vision has always been to create and curate a harmonious blend of design and quality, as well as a positive contribution to living well. Parisi's Italian supplier partners are world leaders in design, innovation and manufacturing.

COTTO®

COTTO has established itself as a world-class manufacturer of sanitary ware. Offering bathroom ideas of different styles and designs, which can serve as an inspiration for your own bathroom.

CENTRAL BRASS®

Products from Central Brass have been the go-to resource for contractors, builders and plumbers for over 100 years. Their goal is to make choosing kitchen mixers and fixtures the easiest part of the project.

apaiser

THE HOME OF BATH COUTURE

Styled by nature. Perfected by hand. The Apaiser story starts with award-winning bathware, proudly Australian owned. Driven by a dream to transform the bathroom, founder Belinda Try introduced the world to her brand Apaiser™, in 2000. Her revolutionary ApaiserMARBLE® launched four years later, showcasing a luxurious non-porous marble material, enriched with the purity of Australian minerals.

Today, Apaiser bathware is globally recognised and coveted in the best hotels, resorts and residences. Each bathware piece is individually sculpted by master craftsmen. The Apaiser signature offering of Bath Couture® embodies complete customisation for those who dare to be different, inspiring a new generation of absolute luxury. The evolution of the bathroom is complete with Apaiser Bath Couture.

for the extended range.

REVOLUTIONARY MATERIAL

Born of the elements, distilled by nature, strengthened by man and inspired by design, ApaiserMARBLE® is a luxurious high performing marble, enriched with the purity of Australian minerals. This revolutionary material delivers a naturally organic and sensual quality to the bathroom experience and can be crafted into the most inspiring bathware by the world's leading designers.

Launched after years of research and development, the groundbreaking ApaiserMARBLE proves to be one of the highest performing bathroom materials in the marketplace. While retaining the sensual touch, luxurious feel and health benefits of marble, the material delivers increased strength, high performance and lower weight, whilst achieving global technical standards, independently verified. Tactile to touch and shaped by hand with absolute perfection, ApaiserMARBLE exemplifies the best of modern technology, melded with the meticulous craftsmanship of the artisan. The result - durable, hygienic, design-driven bathware.

SCULPTED BY HANDS

Every piece of Apaiser bathware is created by a team of highly experienced master craftsmen, who have perfected their trade over many years. Hand finished in their specialised ISO 9001 and ISO 14001 atelier, each Apaiser piece is crafted by their artisans who meet the most fastidious standards. Apaiser is deeply committed to quality and design at every stage, resulting in beautiful works of sculptured art that are highly functioning in the bathroom.

More than 12 master craftsmen will spend over 300 hours carefully creating each piece of Apaiser bathware by hand, adhering to the highest atelier production standards. Handcrafted to perfection, it's little wonder apaiser is the preferred choice of the world's most renowned hotels, architects and designers.

SUSTAINABLE LUXURY

As a proud Australian brand, their desire to preserve the environment of our beautiful country and the world around us, inspired them to create repurposed marble bathware. A product which was sympathetic to and impacted benignly on the environment. Their commitment to ethically sourced materials and environmentally sensitive production have been a core part of their brand DNA since our inception over 20 years ago. At the same time, we strive to maintain the highest manufacturing standards and design excellence.

Haven Freestanding Bath
Finish: Saltbush

Their ApaiserMARBLE® is made from up to 90% reclaimed marble, a by-product of the marble industry that would otherwise contribute to landfill. Their atelier is ISO 9001 and ISO 14001 compliant and has been designed with specialised air filtration systems, as well as internal water and waste management programmes. During our finishing process, we use recycled water to limit our consumption and little mechanisation to reduce greenhouse gas emissions. Their pieces contain minimal man-made ingredients, are non-toxic with no added silica and free from aluminum trihydrate (ATH), so our clients can enjoy a guilt-free soak in a beautiful, sustainable bath.

Oman Freestanding Bath
Finish: Nimbus

“

In the turmoil of our busy lives I craved a space to reflect and revitalise at home. Apaiser was created to achieve this goal. Through the development of sustainable luxury bathware, I set out to dress the bathroom in the uncomplicated joys of nature. At Apaiser, The Home of Bath Couture, expression knows no boundaries.

COLOUR PALETTE

Experience the difference with ApaiserMARBLE®, enriched with pure Australian minerals.

All Apaiser products are handcrafted from ApaiserMARBLE® – a luxurious blend of repurposed marble, combined with stone and minerals sourced from the rich soils of the Australian Barossa region.

➔ FLAMINIA.

MINIMAL TO ORGANIC, FROM RATIONAL TO ARTISTIC

Ceramica Flaminia's choral design project works with artists from various backgrounds who draw their inspiration from different cultures and traditions, giving their own interpretation of ceramics and bathroom design.

As bathroom design trends lean towards mixing different products to create a home that reflects personality, Flaminia partners with designers of great cultural prominence, focusing on an innovative design approach and highly recognisable styles.

Flaminia dedicates much of its energy to the development of solutions that can support and give shape to the creativity of the designers, as well as make it possible to realise highly complex projects. From minimal to organic and rational to artistic, these design styles are built on a feeling for the material and the skills of the company's expert craftsmen.

COLOUR IS THE FUTURE

Behind each product in the catalogue there is not only the intent to enrich the range, but the desire to experiment with ceramics, open a path for the design of the future, propose a new bathroom aesthetic, bring to light a product that, declining colours and shapes, expresses character and personality.

We have always placed the emphasis on chromatic research.

We conceive colour as a design element like form and function and not just a decorative element.

A wide palette of colours that ranges from matt textural shades, such as Argilla, Fango and Carbone, to bright and glossy colours.

There is no shortage of glossy metal finishes, Gold and Platinum are also available for that glamorous look.

DESIGNED BY GIULIO CAPPELLINI

Giulio Cappellini was born in Milano in 1954. In 1979 he graduated with a degree in Architecture and then attended the Bocconi University School of Management. In 1979, he joined Cappellini and assumed the role of Art Director and designer. During his company experience, he has worked alongside various young designers from all over the world, whose talent he has often spotted himself, creating a furnishing collection that is exhibited in some of the most prestigious art and design museums worldwide.

DESIGNED BY MASSIMILIANO BRACONI

Massimiliano Braconi was born in Civita Castellana. After obtaining a high school diploma in Art Studies, he received a degree from the Istituto Europeo di Design (IED) in Rome. In 2000, he founded his own design studio in Viterbo. Braconi describes his continually evolving style as that of an “unconventional, visionary artist”. He brings his utopian ideas to life in the widest, most liberating sense possible, advancing his art in the constant pursuit of an aesthetic that shapes the authentic experience of the individual.

ADVANCED CLAY TECHNOLOGY

CottoCeram™ advanced clay technology provides a durable, anti-crazing finish.

ULTRA SLIM

Ultra Slim Cotto ceramic technology is an art piece to match any bathroom.

BARE

CONCRETE

COLOURED CONCRETE FOR EVERY BATHROOM STYLE

Elementi BARE concrete basins combine warm pastel colours with the natural industrial elements of concrete to create a focal point in any bathroom. Each piece is handcrafted and distinctively designed to embrace the natural properties of concrete. Custom colours are available upon request with a four week manufacturing time.

Subtle variations in colour, shade and texture are to be expected. These should be viewed as unique characteristics that add a natural touch to your concrete product. Discolouration and natural pitting can occur over time.

CONCRETE FEATURES

MANUFACTURED IN NEW ZEALAND

Elementi concrete basins and furniture are manufactured in New Zealand, using high quality materials combined with superior craftsmanship to produce innovative and beautiful bathroom furniture of the highest standard that will last for years to come.

HAND CRAFTED

Each concrete piece is hand crafted locally with a mixture of many different raw ingredients. Subtle variations in colour, shade and texture are to be expected. These should be viewed as unique characteristics that add a natural touch to your concrete product. Discolouration and natural pitting can occur over time.

UNIQUE CONCRETE

Engineered Cementitious Composites (ECC) is a unique type of concrete which is known for its tensile strain-hardening behaviour and tensile ductility contrasting, making it a significant improvement from ordinary concrete and glass fibre reinforced concrete (GFRC).

CONCRETE VESSEL BASINS

**BARE 470
HAND PRESSED CONCRETE
SQUARE VESSEL BASIN**

470(L) X 340(W) X 110(H)
NTH / NO OVERFLOW

BHP470__

ADVANCED RAW TECHNOLOGY

Handcrafted here in New Zealand, each concrete basin is a unique work of art. The handpressed finish concrete basin range is exceptionally unique in appearance with its raw and natural “perfectly imperfect” finish.

The handpressed finish is created exactly as the title suggests, handmade concrete moulded together to create emphasised veins and texture through the concrete.

**BARE 470
FLUTED CONCRETE
SQUARE VESSEL BASIN**

470(L) X 340(W) X 110(H)
NTH / NO OVERFLOW

BF470__

FLUTED CONCRETE

Create a real focal point in your bathroom by combining trending fluted design with the natural elements of concrete. Providing an emphasis on touch and texture, Fluted Bare Concrete basins take personalisation of your bathing space to new heights.

THE "SOTTOSQUADRO" CURVE

The NUR collection represents the pinnacle of Italian engineering and sanitary design, with the edges of the Nur washbasin requiring a reinterpretation of the classic casting process to accommodate the "Sottosquadro" curve. Craftsmen are required to gradually remove the plaster molds by hand to allow for a multi-stage drying process. The negative inclination of the edge is unique and represents the renewed ambitious attitude of Alice together with the designer Massimiliano Braconi.

Spy 400 Wall Basin
Finish: Matt White

**DESIGNED BY
MASSIMILIANO BRACONI**

The essence of Italian minimalism by Alice Ceramica Art Director and Designer Massimiliano Braconi.

Spy is a collection of washbasins specially designed for saving space, practicality, and comfort. A great statement piece to neatly fit any modern bathroom.

ULTRACLEAN+

Cotto's research and development team have developed a new technologically advanced compound called "UltraClean+". These compounds used inside and outside of vitreous china help reduce the accumulation of germs and bacteria with a self-reduction rate of 99% within 24 hours. UltraClean+ has the added benefit of increasing the ceramic strength and integrity as well as reducing the porous surface inherent in ceramics.

The first layer of the compound is sprayed white and fills any gaps that might be present before beginning the heat treatment process. A second layer is then applied which makes the ceramic surface smoother and flawless by eliminating any rough imperfections.

A separate internal sleeve prevents accidental scalding by keeping hot water away from the exterior. Using an insulated bottle trap can eliminate the need for a semi pedestal/cover.

Refer to your local regulations for details.

BATHS

apaiser

SCULPTED BY HANDS

Every piece of Apaiser bathware is created by a team of highly experienced master craftsmen, who have perfected their trade over many years. Hand finished in specialised ISO 9001 and ISO 14001 atelier, each Apaiser piece is crafted by their artisans who meet the most fastidious standards. Apaiser is deeply committed to quality and design at every stage, resulting in beautiful works of sculptured art that are highly functioning in the bathroom. More than 12 master craftsmen will spend over 300 hours carefully creating each piece of Apaiser bathware by hand, adhering to the highest atelier production standards. Handcrafted to perfection, it's little wonder Apaiser is the preferred choice of the world's most renowned hotels, architects and designers.

STONETEC ARCHITECTURAL CONCRETE

Stonetec is defined as a refined architectural concrete item contrived to reproduce natural stone. Once the materials are fully reacted in the manufacturing process, they become stable with minimal adverse effect on air quality. Stonetec is therefore the new generation of environmentally friendly product.

FREESTANDING QUARRYCAST® BATHS

victoria ⊕ albert®

VOLCANIC LIMESTONE. A SUPERIOR LONG-LASTING ALTERNATIVE TO CAST IRON AND ACRYLIC

A naturally superior bath: It may sound obvious, but not all baths are created equal. British brand Victoria + Albert are passionate about their unique Quarrycast® material, made from a finely ground volcanic limestone and resin mix.

Volcanic Limestone™ is Victoria + Albert's name for the very special white rock that is perfect for making baths and basins.

This is formed when the elemental forces associated with liquid magma act upon surrounding soft, chalky limestone.

The immense heat and pressure from the magma transforms the neighbouring rock into a new material made up of incredibly hard strands.

Victoria + Albert blends milled Volcanic Limestone™ with high quality resins to bind these strands into a complex 3D matrix. The finished result is Quarrycast® - a world-class composite with an exceptional strength-to-weight ratio.

ADDING A SOFT TOUCH WITH NEW MATT WHITE FINISH

Victoria + Albert has recently revealed a softer side to selected baths and basins in their Quarrycast® collection with the inclusion of a Matt White finish. The new sophisticated finish is luxuriously soft to touch, easy to clean and less prone to smudges and marks from fingerprints.

Matt White Quarrycast has been initially released in the Vetralla II and Barcelona 1700mm bath and Barcelona 550mm basin.

FREESTANDING QUARRYCAST® BATHS

TAIZU COMING FULL CIRCLE

Taizu is Victoria + Albert's first collaboration with renowned Hong Kong based designer Steve Leung, who is known for using Asian influences in his designs.

The opulent circular bath has been inspired by the fine porcelain designs of the Song Dynasty. The gently sloping sides are softened by a chamfered edge and sculpted detail at the base. With a diameter of 1500mm and cast in Victoria + Alberts signature Quarrycast™ material, Taizu is a spa-style centrepiece that is at home in the most luxurious bathrooms.

Note: Contact us for availability.

GLOSS WHITE QUARRYCAST.
5202710

“

Bathing is a relaxing experience, reinvigorating the body and mind. Daily life is increasingly intense; this moment of tranquillity is a precious indulgence. I wanted to create an iconic bath that draws a connection between East and West, referencing the past with a view to the future.”

Steve Leung

Void space for waste plumbing

WARNDON

With its classically ribbed rim, the Warndon bath's form adopts the detailing originally found in classic stonework and embodies a rich history suitable for a range of interiors. Following the traditional design rules of strict symmetry, this double-ended freestanding bath makes a perfect visual centrepiece for balance in the bathroom. The design falls gracefully to the floor allowing all waste pipe work to be hidden, maintaining a sleek bathroom finish.

A DESIGN ICON REIMAGINED

The Barcelona's new patented intelligently chamfered rim provides improved neck and arm comfort.

The Victoria + Albert design lab has refined the ergonomics and improved aesthetics by developing a varying radius on the rim of the bath to better support the lower back and neck without compromising the organic shape.

“

An intelligently chamfered rim provides improved neck and arm comfort + aesthetics ”

A. Arm comfort

B. Head and neck comfort

C. Back comfort

D. Matching basin

A SIZE TO SUIT EVERY SPACE

Available in 3 sizes

VOID SPACE

A new feature of the Barcelona is a void space underneath the bath for waste plumbing and P-Trap installation (depending on trap height). A reduced internal depth also allows for easier transfer in and out of the bath, makes bathing children effortless, and requires less water to fill.

Void space for waste plumbing

SOFT TOUCH

The Barcelona 1700 bath is available in a Matt White finish. The new sophisticated finish is luxuriously soft to touch, easy to clean and less prone to smudges and marks from fingerprints.

FREESTANDING QUARRYCAST® BATHS

MOZZANO II

A beautifully crafted rimless freestanding bath, designed with confident curves and ergonomic design, Mozzano II delivers a strong architectural presence in compact bathroom spaces.

A new feature of the Mozzano II is a void space underneath the bath for waste plumbing and P-Trap installation (depending on trap height). A reduced internal depth also allows for easier transfer in and out of the bath, makes bathing children effortless, and requires less water to fill.

Void space for
waste plumbing

LUSSARI

Designed with the utmost care and precision, the Lussari incorporates a sleek and elongated shape considering clean comfort and refinement for a relaxed bathing experience.

The Lussari 1700 is designed to make the most of larger spaces. It evokes the simplicity of a freestanding bath with the clean lines of back-to-wall, fitting beautifully into a range of interior styles. Installed against the wall for a watertight seal with a spacious deck for mounting tapware and holding bathroom luxuries.

The perfect option for master suites and family bathrooms.

BACK TO WALL

At 1700mm long the Diseno contemporary acrylic back-to-wall bath is perfect space saving solution for bathrooms large and small where clean lines and day to day practicality are equally important.

Cross-linked high grade acrylic for an extra smooth finish plus superior scratch and stain resistance.

Rear surface suitable for deck mounted tapware.

Void space for waste plumbing and adjustable feet for easy installation.

SQUARE BACK AND SIDE EDGE

The Otto and Diseno baths feature a square back allowing the bath to sit flush against a wall.

PAN

Pan Basin Mixer
Finish: Brushed Gold

Pan Goose Neck
2TH Basin Mixer
Finish: Chrome

“The Pan collection is our interpretation of the basic cylinder type single lever mixer, which begins with classic archetypes and goes on to develop completely original aesthetics and new types of taps. We focused our attention on the joint between the vertical and horizontal elements: as in nature there are no cuts and weldings, so that the spout and handle are derived from the body of our tap, through a soft connection, designed like the trunk of a tree, according to exactly the same smooth logic found in the graft between the trunk and the branch of a tree.”

Ludovica + Roberto Palomba

ZUCCHETTI.

GILL

Gill Bath Column
Finish: Brushed Nickel

With its clean, essential design, Gill strikes the right balance between different interlocking cylindrical elements: the body, spout and lever are defined by varied circular sections with delicate, original curves.

The Gill line is composed of single lever mixers and other items that are characterised by their simplicity and adaptability, ideal for contract projects and bathrooms both large and small.

Zucchetti is available via selected distributors. Visit [ROBERTSON.CO.NZ](https://www.robertson.co.nz) or contact DESIGNIDEAS@ROBERTSON.CO.NZ for more information

BRIM

Brim Wall Mounted Basin Mixer
Finish: Chrome

Brim Basin Mixer
Finish: Brushed Nickel

“Brim is the result of research into shape that started a long time ago and of a follow-through that has teamed modernity and simplicity of geometrics. Brim is the synthesis and the sum of an industrial design project that began with the Soft mixer and has evolved according to ever-modern canons, managing to tune opposing geometrics to achieve perfect proportions.”

Ludovica + Roberto Palomba

Reassuring and essential, the Brim collection stands out for its compact design that uses a single lexicon to elaborate two different shapes: the circle and the square. The outcome of these efforts is a complete series of single-lever mixers with harmonious proportions and delicately rounded lines.

NEW

LENTE

Lente Shower Mixer
Finish: Brushed Brass

'Lente' Italian for Lens, draws inspiration from the shape and texture from one of photography's greatest assets, the camera lens. With round handles, incorporating a delicate vertical knurl, minimalist elegance meets functional brilliance. Paired with a gracefully curved spout, the smooth lines and subtle contours redefine modern sophistication.

Each piece is crafted with precision and care, ensuring a perfect balance between style and practicality. Ideal for those who appreciate the beauty of simplicity and seek a sophisticated, functional enhancement to their bathroom.

FEATURES

4 mounting points

DZR brass

15mm male threaded connections

Round and square face plate included

Reduced body size with 90mm faceplate

New adhesive faceplate seal

OFF (Cold)

Hot

Up to 30mm adjustment from finished wall to back of faceplate

Family friendly with cold start when first turned on to protect user against injuries from hot water and avoid the risk of scalding.

Generic handle complements all faucet designs

Etched textured handle

Using Intelligent Valve Technology (IVT), water temperature is adjusted by one rotational motion for precise temperature control. Hot, Warm and Off indication marked on faceplate.

Warm

Note: The cartridge and handle can be changed to create a lever handle volume and temperature mixer.

30MM ADJUSTMENT RANGE

The Mains Pressure shower mixer features a 30mm adjustment range allowing for different installation requirements and thickness of wall/cladding materials.

OPTIONAL 13MM EXTENSION KIT

43mm of adjustment (to the back of faceplate) can be achieved using the 13mm extension kit. Code: **43472.00**

Note: Compatible with 40mm Mains Pressure Valve only.

TOILETS

ELEMENTI®

WITH ELEMENTI TOILETS YOU HAVE THE REASSURANCE OF OUR EXPERTISE IN CERAMICS AND HYGIENE TECHNOLOGY, MEANING EASY TO CLEAN AND EASY TO MAINTAIN FOR YEARS TO COME. FROM FEATURES LIKE E-GLAZE TECHNOLOGY THAT REDUCES BACTERIA GROWTH, TO THE SUPER-POWERFUL HYPER JET FLUSH, AN ARRAY OF TECHNOLOGIES ALL WORK TOGETHER TO MAKE ELEMENTI TOILETS HYGIENIC, DURABLE AND STYLISH.

HYPER JET FLUSHING

Rimless flushing projects a jet of water rather than the traditional flushing mechanism where water pours down the rim. Through the powerful delivery of water, maximum cleaning is achieved.

GOSWIRL FLUSH

A sole surge of water is projected from one outlet at the front side of the bowl which then follows the contours in a clockwise GoSwirl motion, offering a powerful yet efficient clean (Gira toilet only).

SOFT CLOSE SEAT

Both seat and lid have a gentle and quiet soft-closing mechanism for silent ease of use.

HAND FINISHED CHINA

Hand finished using fine fireclay for ultra smooth finish.

SUPER CLEAN E-GLAZE TECHNOLOGY

Exclusive to Elementi, E-Glaze offers 5 layers of antibacterial glaze, reducing the accumulation of germs and bacteria.

HYGIENIC RIMLESS DESIGN

There are no hard to reach areas with the new rimless design allowing easy cleaning with a single wipe.

EFFICIENT INSTALLATION

Installation is efficient thanks to clever design, a variable range of set outs and the inclusion of Angle Stops.

DISTINCTIVE FINISHES

Elementi offers three quality Vitreous China finishes in Gloss White, Matt White and Matt Black offering a premium point of difference to your bathroom.

10 YEAR GUARANTEE*

Without exception Robertson products are guaranteed to meet or exceed the standard requirements for the New Zealand building code. For your peace of mind Elementi Toilets also come with a 10 year guarantee*.

TOILET TYPES

BACK TO WALL (BTW) CC TOILET SUITE

The back to wall close coupled toilet suite adds a streamlined, modern look to any bathroom. Positioned flush with the wall, there is no gap behind and all waste and inlet pipes are concealed, with the cistern then positioned above the bowl.

OVER HEIGHT (OH) BACK TO WALL (BTW) CC TOILET SUITE

With a pan and seat up to 40mm higher than standard toilets, the overheight toilet allows for easy transfer on and off the seat. This not only makes life easier as we increase in age, but is ideal for the elderly and those with restricted movement.

CLOSE COUPLED (CC) TOILET SUITE

The close coupled suite has the cistern fitted against the wall and the pan is positioned away from the wall. The gap between the wall and the pan varies according to the model.

BACK TO WALL (BTW) TOILET PAN

The back to wall toilet pan has an in-wall cistern and a fully concealed waste which hides exposed pipes. The back-to-wall pan runs all the way to the wall and is easy to clean with smooth, seamless lines.

WALL HUNG (WH) TOILET PAN

The wall hung toilet is mounted to a bracket in the wall. It takes up less space than a traditional unit and with an in-wall cistern, provides a clean, uncluttered appearance.

BACK TO WALL (BTW) AND WALL HUNG (WH) BIDETS

The wall hung bidet fixes to the wall unobtrusively, while the back to wall bidet takes a more conventional floor mounted form.

E-BIDET SMART TOILETS

An E-bidet (electronic bidet seat) requires an electrical point and comes with additional comfort features such as massage cleansing, warm water cleansing, heated seat and dryer, and is operated via a side control panel or a remote control.

URINAL

The wall hung urinal is available with automatic or manual flushing options.

S TRAP OR P TRAP?

P TRAP

The term P trap indicates that the outlet (waste) pipe goes through the wall.

S TRAP

The term S trap indicates that the outlet (waste) pipe goes through the floor.

Note: Your choice of S or P trap will depend on availability of access through the floor or wall.

ELEMENTI[®]

➔ FLAMINIA.

MINIMAL TO ORGANIC, FROM RATIONAL TO ARTISTIC

Ceramica Flaminia's choral design project works with artists from different backgrounds who draw their inspiration from different cultures and traditions, giving their own interpretation of ceramics and bathroom design.

As bathroom design trends lean towards mixing different products to create a home that reflects personality, Flaminia partners with designers of great cultural prominence, focusing on an innovative design approach and a highly recognisable style.

Flaminia dedicates much of its energy to the development of solutions that can support and give shape to the creativity of the designers, as well as make it possible to realise highly complex projects. From minimal to organic and rational to artistic, these design styles are built on a feeling for the material and the skills of the company's expert craftsmen.

Ceramics of Italy

THE SILENT EVOLUTION

GoSilent is the new Flaminia silent flushing system, representing the evolution of 'GoClean' which combines the elimination of the rim with the reduction of noise.

GoSilent Flush makes cleaning the internal parts of the toilet easier and maximises hygiene with every flush. Coupled with better water consumption than original design, but its major innovation is silence. The reduction of noise using GoSilent technology is about 50% quieter compared to the previous GoClean model.

LOW LEVEL INWALL CISTERN

The new "low level" inwall cistern is not as high as standard inwall cisterns. The benefit being they can fit in a smaller space like under a window. They are also cable operated with top or front flush options.

FEATURES

- Weight tested to 400kg
- Easily maintained with all maintenance is through the front panel with no special access panel required unless you are isolating the push panel (Pneumatic)
- Parts easily replaced and available
- Pneumatic, mechanical or cable operation
- Multiple design and colour options for push panels
- Remote installation with up to 3m for Pneumatic push panels
- WELS 4 star rating 4.5/3L 3.3L average flush
- Made from high density polyethylene
- Wall fixing kit included
- Multiple fixation points for the installer
- All fixations and pipework supplied to install to the soil pipe

PUSH PLATES

When using the pneumatic option and installing the inwall cistern into a 90mm cavity:

- The cistern can be reversed so the maintenance panel can be in a different room or closet.
- Maximum distance from cistern is 3000mm.
- Installer will need to fabricate the flush pipe if installed remotely.

ACCESSIBLE BUTTONS

The Accessible Twin Button Push Plate includes raised buttons extending 25mm for ease of use coupled with embossed domes for those with visual impairment. See page 313.

OLI

HYGEA

WHY HYGEA?

In Greek as well as Roman mythology, Hygea was the goddess/personification of health, cleanliness and sanitation. She was associated with the prevention of sickness and the continuation of good health. Her name is the source of the word "hygiene".

Hygea is a new concept of smart toilet... its natural evolution. The electronic bidet module, that can be installed or replaced very easily like a cartridge, is inserted into the toilet bowl from above and is completely disconnected from its casing and from the seat.

This hygienic and innovative modular system can be easily updated with new electronic bidet models developed in the future, without necessarily having to replace the seat as well as the toilet.

COLOURS

Who said that a toilet has to be white? Hygea has been designed to accommodate customers' tastes and market trends. Available in Gloss White, Matt White, Matt Sand, Matt Grey and Matt Anthracite. Offering a stylish look that is pleasant to touch.

THE INNOVATIVE SYSTEM

Oli have developed a new system consisting of five elements: the toilet bowl, the fixing plate, the electronic bidet, the casing that contains it and the seat. 26 months of work, 7 teams, 54 people involved in the creation of what we believe is the most functional and hygienic of smart toilets on the market. A simple product, revolutionary and particularly attentive to the environmental impact.

MAIN FEATURES

The electronic bidet is Hygea's beating heart. Made with the best Korean technology, it has been designed to meet the needs of the most demanding customers. The functions have been carefully selected and optimized in order to provide the best possible experience.

A stainless-steel nozzle provides intimate hygiene, while drying is performed by a high efficiency device. The self-draining and anti-lime buildup functions ensure greater hygiene and reliability.

FEATURES/FUNCTIONS

HIGHERGLAZE

Superior quality for Hygea. Its surface is perfectly smooth and does not allow dirt and scale to settle. This guarantees lasting shine, pleasant touch, high protection against scratches, abrasions and external agents. The extreme ease of cleaning also allows a lower consumption of water and detergents in respect of the environment.

RIMLESS

This new generation of sanitary ware combines design and functionality, thus allowing for an integral cleaning of the entire bowl, a precise and controlled flow rate without over splashes.

ZEROBACT®

The innovative ZEROBACT® glaze is a total barrier against germs and bacteria. Integrated into the glaze and fired with the sanitary, it grants a lasting and limitless protection over time. This glaze has a certified effectiveness equal to 99.9%. Iso 22196:2011 Certification. ZEROBACT® glaze is supplied upon request.

E-BIDET SMART TOILETS

NEW

INTEL

INTELLIGENCE REDEFINED

The latest E-Bidet Smart Toilet, Intel redefines bathroom luxury with its innovative features and stylish design. It offers customisable water temperature and pressure, as well as personalised cleaning modes for an exceptional user experience. Its sleek aesthetic complements any decor, while durable materials ensure long-lasting performance.

Intel's minimalist design conceals all pipework, reduces toilet paper usage and promotes a more sustainable approach to hygiene. The e-bidet seat provides a gentler, more hygienic clean, enhancing personal comfort. Features like customisable front and rear cleansing options, oscillation, pulsating massage, and adjustable aerated water are easily controlled with a simple dial.

Ideal for those with restricted movement, the E-Bidet simplifies the cleaning process, offering comfort and confidence. It includes four levels of adjustable warm air drying and a foot sensor that allows the seat to lift without hand contact. An LED screen displays essential information, while the rimless design allows for easy cleaning.

Intel's double filtration system removes impurities, and an activated carbon filter helps reduce odours. The intelligent remote control provides quick access to all features, and the unit is tested to support up to 250kg. Even without power, the bidet remains functional, though water temperature adjustments won't be available.

Additional features include nano anti-bacterial glazing and an adjustable heated seat. A built-in night light enhances safety by illuminating the toilet bowl. With four unique cleaning modes – Feminine, Hip, Mobile, and Massage. Intel offers a customizable experience for every user. Its easy installation and maintenance make it a perfect choice for any household, and it's designed specifically for New Zealand homes, fully compliant with safety standards.

E-BIDET SMART TOILETS

NEW

INTEL

CONCEALED WATERWAYS & CABLES

This intelligent e-bidet has all the pipework and cables concealed within, contributing to its sleek and minimalist design.

LED DISPLAY

LED Screen displaying essential operational information with various temperature and settings.

ENVIRONMENTALLY FRIENDLY

Smart toilets decrease toilet paper use, avoiding harmful chemicals that clog plumbing. These bidet seats provide a gentler, more hygienic clean and reduce environmental impact.

RIMLESS DESIGN

There are no hard to reach areas with the new rimless design allowing easy cleaning with a single wipe.

SMART TECHNOLOGY FOR COMPLETE CLEANLINESS

Offering customizable front and rear cleansing options, plus features like oscillation, pulsating massage, and adjustable aerated water – controlled with a simple dial.

POWER SAVING & MEMORY

Energy Saver Mode can be activated when toilet is not in use. Previous user settings retained for convenience.

DESIGNED TO LAST

This durable seat has a load-bearing lid, quick-release mechanism, and easy-to-clean surface. Its sleek, minimalistic design ensures both comfort and durability.

DOUBLE FILTRATION

The double filtration system helps filter out any impurities in the waterline. Whilst the Activated carbon filter helps reduce those bathroom odours.

AID FOR ACCESSIBILITY

Perfect for those with restricted movement, an E-Bidet takes the hassle out of the cleaning process, providing comfort and confidence to those that need it most.

REMOTE CONTROL

The remote control allows for easy access to all features, enabling personalised adjustments with just the touch of a button.

ADJUSTABLE AIR DRYER

4 Levels of warm air can be adjusted at will, helping you dry off.

STRENGTHENED SUPPORT

Seat weight tested to 250kg ensuring stability and assurance.

Note: It is a requirement of Australian/New Zealand regulators that the water supply to this product must be protected by a high hazard backflow prevention device, such as a reduced pressure zone device (RPZD). As per AS/NZS 3500.1, the RPZ shall be maintained in working order and tested for operational functions at intervals not exceeding 12 months. Any electrical work connected to this product must be installed by qualified personnel in accordance with AS/NZS 3000.

FOOT SENSOR

An ingenious foot sensor allows you to lift the seat and without any hand contact by simply tapping your foot against the side of the pan.

WASH WITHOUT POWER SUPPLY

Bidet is still operational without power, however the water temperature and seat temperature cannot be adjusted if power is off.

ADJUSTABLE WATER TEMPERATURE

Instant water heating . Adjust the water temperature up or down for your desired level of comfort.

ONE BUTTON SWITCH

One button switch used to adjust water volume and spray type allowing the user to tune to their preferred comfort level.

ANTI BACTERIAL

Nano Anti-Bacterial Glazing ensures a hygienic environment.

HEATED SEAT WITH ADJUSTABLE TEMPERATURE

A heated toilet seat enhances comfort by eliminating the shock of cold surfaces, making bathroom visits more pleasant.

GUARANTEE

10 Year Guarantee*
2 year guarantee on seat*
1 year guarantee on Cistern
Parts and Electrical components.

FLAME RESISTANT MATERIAL

Enhanced safety, designed to resist ignition and slow the spread of fire.

NIGHT LIGHT

A built in night light enhances safety and convenience by illuminating the toilet bowl during the night, reducing the need for harsh overhead lights and helping to prevent accidents.

4 MODES OF CLEANLINESS

The E-Bidet Smart Toilet offers four cleaning modes: Feminine, Hip, Mobile, and Massage Cleaning, ensuring a customisable and comfortable experience.

NOZZLE CLEANING

Automatic nozzle cleaning/rinse with each use. For additional cleaning simply select Self Cleaning on the remote.

EASY FIX

Quick and easy install with the bidet module fully accessible and easily removable aiding in the convenience of cleaning and maintenance.

AUTO OPEN/SOFT CLOSE SEAT

An automatic opening soft-closing toilet seat add hygienic benefits allowing the user use without making hand contact.

DESIGNED FOR NEW ZEALAND

Designed specifically for NZ households, being Watermark and equipped with RCD/Surge Protector ensuring full compliance and no safety risk

E-BIDET SMART TOILETS

NEW

FRESCA

The Fresca E-Bidet exemplifies innovation with its array of customizable features designed to enhance the personal hygiene experience. Users can adjust the temperature of both the water and the seat, ensuring a tailored and refreshing experience. The bidet's design allows for precise control over the water pressure and provides a personalised touch to cater to individual preferences. These features collectively contribute to a more comfortable and effective cleaning process, redefining the standards of bathroom luxury.

SLEEK DESIGN

Unlike bulky bidet models that rely on large water reservoirs to heat bidet water, this intelligent bidet seat utilises instant water heating technology, contributing to its sleek and minimalist design whilst aiding comfort.

ENVIRONMENTALLY FRIENDLY

Smart Toilets diminish your reliance on toilet paper, a notorious source of harmful chemicals that clog toilets and sewer systems. These intelligent bidet seats provide a gentler, simpler, and more hygienic bathroom cleansing solution, offering the added benefit of reducing your environmental footprint.

SMART TECHNOLOGY FOR COMPLETE CLEANLINESS

Providing fully customisable rear and front cleansing options, along with features like shower oscillation, pulsating massage, and aerated bubbly water infusion technology – all adjustable with a simple turn of the dial.

DESIGNED TO LAST

This expertly crafted seat features a durable load bearing lid, quick-release mechanism, and an easy-to-clean seat. Despite its sleek, minimalistic profile, it's ergonomically designed for both comfort and durability.

AID FOR ACCESSIBILITY

Perfect for those with restricted movement, combining the practicalities of an Accessible Overheight toilet and an E-Bidet takes the hassle out of the cleaning process, providing comfort and confidence to those that need it most. Selected models comply with NZS 4121:2001.

WASH WITHOUT POWER SUPPLY

Bidet is still operational without power, however the water temperature and seat temperature cannot be adjusted if power is off.

ADJUSTABLE WATER TEMPERATURE

Adjust the water temperature up or down for your desired level of comfort.

ADJUSTABLE WATER VOLUME

One button switch used to adjust water volume allowing the user to tune to their preferred comfort level.

ANTI BACTERIAL

Seat and Nozzles are made from antibacterial materials ensuring maximum hygiene.

HEATED SEAT WITH ADJUSTABLE TEMPERATURE

A heated toilet seat provides enhanced comfort by eliminating the shock of sitting on a cold surface, making bathroom visits more pleasant, especially in colder weather.

NIGHT LIGHT

A built in night light enhances safety and convenience by illuminating the toilet bowl during the night, reducing the need for harsh overhead lights and helping to prevent accidents.

TWIN NOZZLES

Featuring twin nozzles for dedicated front and rear cleansing resulting in more precise and efficient cleansing.

SELF CLEAN

After the user is seated, the nozzle will automatically close, followed by 5 seconds of self cleaning. Following use, the nozzle will then close and endure another 2 seconds of self cleaning.

EASY FIX

Quick and easy install with adjustable fixing/simple detaching allowing for convenience of cleaning.

SOFT CLOSE

A soft-closing toilet seat helps to minimise noise and prevent slamming, offering a quieter and more gentle experience for everyone in the household.

DESIGNED FOR NEW ZEALAND

Designed specifically for NZ households equipped with type I 240 plugs and RCD/Surge Protector ensuring full compliance and no safety risk.

GUARANTEE

10 Year Guarantee*
2 year guarantee on seat*
1 year guarantee on Cistern Parts and Electrical components.

Complies with AS 2845.1:2022 Water supply - Backflow prevention devices requirements. Check with your installer and/or local council for any additional Back Flow requirement that may be needed.

A FRESH ERA IN HYGIENE

Fresca, the Italian word for 'Fresh' optimises the latest addition to our E-Bidet Smart Toilet offer, providing a cutting edge hygienic solution to the modern bathroom.

E-Bidet Smart Toilets represent a revolutionary advancement in bathroom hygiene, merging modern technology with user comfort.

In addition to its high level of customisation, the Fresca E-Bidet boasts a sleek, minimalist design that integrates effortlessly into any bathroom decor. Its aesthetic appeal is matched by its intuitive controls, which are engineered to be user-friendly and straightforward. This ensures that even those new to bidets can operate the system with ease. The bidet's compact and modern look not only enhances the visual appeal of the bathroom but also ensures that it fits seamlessly into various interior styles, making it a versatile addition to any home.

Beyond its aesthetic and functional benefits, the Fresca E-Bidet is designed with sustainability in mind. It features eco friendly water saving technology that reduces water consumption while maintaining an effective cleansing experience. The self cleaning nozzle further promotes optimal hygiene, minimising the need for manual cleaning and reducing the risk of bacterial buildup. By incorporating these environmentally conscious features, the Fresca E-Bidet supports a cleaner, more sustainable lifestyle, making it an excellent choice for those looking to enhance their daily routines while also contributing to environmental conservation.

URINE DETECTION FLUSHING SYSTEM

The wall hung Envy Urinal with Urine Detection Flushing System uses a solenoid valve to assist with automatic flushing. The flush is activated within 10 seconds after use. If the sensor does not detect any usage for 48 hours, the urinal will automatically flush. Options available with setting.

DURACLASS SLIDER

Crafted by combining premium-grade materials with state of the art technology, resulting in a slider with superior durability and longevity. Each individual component is meticulously selected for its quality and performance, ensuring the slider can withstand the rigors of daily use and environmental factors. Simply move lever to adjust slider which allows flexibility of hand piece height and angle.

CHECK VALVES

Hand pieces are fitted with Check/non return valves for back flow protection. This is especially important where the elbow is installed low enough in the shower to possibly cross contaminate with water from another source syphoning back into the water system.

DUAL FIXINGS

Dual fixings provide greater stability and durability, while multiple fixing positions simplify installation, making Elementi accessories the superior choice for any bathroom. With two attachment points, the risk of loosening or falling is minimised, especially in high-moisture environments. This design also helps to evenly distribute weight, reducing stress on the wall and extending the lifespan of both the accessory and the wall.

ANTI VANDAL

An anti-vandal shower head is specifically designed to reduce damage and tampering in public or high traffic restrooms. Constructed from durable materials and a heavy duty mounting plate this shower head is built to withstand rough handling and vandalism attempts.

Featuring a streamlined, minimalist design to minimize the potential for misuse and equipped with tamper resistant fittings along with a flow restrictor to maintain water conservation.

As added flexibility our anti-vandal showerhead has the ability to be installed in either rear water inlet or exposed water inlet situations by simply removing the blanking plug attaching a 15mm pipe connector and hose.

By incorporating these protective features, antivandal shower heads help ensure that public facilities remain functional and hygienic, reducing maintenance costs and extending the lifespan of the equipment.

CBS SENSOR FAUCETS

THE NEW PATENTED TIME OF FLIGHT SENSOR FEATURES CBS (COLOUR BACKGROUND SUPPRESSION) TECHNOLOGY RESULTING IN GREATER PRECISION, ACCURATE DETECTION AND MORE EFFICIENT TAPWARE OPERATION.

Today more than ever we need to consider hygiene in our day to day lives. In a busy bathroom, tapware handles get a lot of usage which makes keeping it hygienic a real challenge. Fortunately, the new Elementi range of Sensor Tapware provides a practical solution that's suitable for Residential, Healthcare and Commercial applications.

A standard Infra-Red sensor may struggle with Black/White coloured targets or reflective materials due to its limited technology, whereby it measures the distance of the target by how bright the light is. The new patented Time of Flight Sensor that features CBS (Colour Background Suppression) technology overcomes this by emitting particles of light with the receiver counting how long the particles take to bounce back. This method is used to work out how far the target is based on the speed the light travels. Resulting in greater precision, accurate detection and more efficient tapware operation.

Our CBS Sensor guarantees detection and activation with greater reliability, even in the most restrictive environments (dim lighting, patterned clothing, shiny & reflective surfaces).

CBS SENSOR FAUCETS

FEATURES

PATENTED TIME OF FLIGHT CBS SENSOR

Colour Background Suppression (CBS) provides a anti-glare sensor that reduces false detection as experienced with Infra-Red Technology.

LOW VOLTAGE TIME OF FLIGHT SENSOR WITH LOW CONSUMPTION MICRO VALVE

With only 4x AA batteries, approximate use = 5 Years @ 200 uses per day (batteries not supplied).

INSTANT FLOW

Water flow within 0.25 seconds from point of sensor activation (within 0.5 seconds if sensor is in sleep mode).

LOW BATTERY WARNING

Sensor will flash if batteries are running low, plus battery failure auto stop with global certification.

EASY INSTALLATION AND MAINTENANCE

The ultra compact micro valve is one piece, making accessibility and maintenance a breeze.

MIXED USE

Certified to use in multiple environments such as those with high temperature or high humidity. Voltage will remain stable regardless of temperature.

LEADFREE

Separated waterways ensure compliance to International Lead free standards.

100% ELECTRONIC CERTIFIED

Reliable sensors, high quality material, will not blind with age or be damaged with cleaning chemicals.

PLUG IN OR BATTERY POWERED

Choose from either Plug in or battery installation with both options provided, giving you maximum flexibility for installation.

AUTO SHUT OFF ENERGY RESERVE

Energy reserved inside to detect main power outage and force closure of water in case of issues.

SURGE PROTECTION

Protection Against surge 2KV and burst 4KV.

WATER PROOF

All components from connectors to power supply are suitable for high humidity and wet environments.

ANTI HAMMER

Built in Anti Hammer. No requirement for calibration.

FLOW TIME

Factory Set to 30 seconds.

FILTER

Filter supplied mandatory use.

ULTRA COMPACT VANDAL RESISTANT DESIGN

Perfect for applications where space is limited with no exposed moving or separated parts.

5 YEAR GUARANTEE*

*Power Supply Pack = 2 Years

*Sensor, Valve, Battery Box, Parts and Labour = 1 Year

CENTRAL BRASS®

A LEGACY OF EXCELLENCE TRUSTED BY COMMERCIAL BUILDERS FOR OVER 120 YEARS

Products from Central Brass have been the go-to resource for contractors, builders and plumbers for over 100 years. Their goal is to make choosing kitchen mixers and fixtures the easiest part of the project. Enjoy the peace of mind that comes from knowing they're a company with decades of experience with a commitment to quality. Rest assured when you choose Central Brass, you're choosing something that is made to last.

Commercial kitchen mixers are indispensable in professional culinary environments, offering efficiency and versatility in food preparation and cleaning up. These robust mixers are designed to withstand the rigours of everyday use. Providing reliable water flow for various kitchen tasks, from rinsing wastes to filling pots for cooking. The essential specialised pre rinse spray is tailored to tackle the unique challenges of maintaining hygiene in a busy kitchen. These powerful sprays are designed to remove grease, grime, and food residues, not only do they create a more hygienic environment but also reduce the risk of cross-contamination and upholding stringent food safety standards.

PRE-RINSE MIXER

Extra spraying power and the convenience of flexible design are the primary advantages of a pre-rinse mixer. These are great for rinsing dishes that have just arrived in the kitchen, or ones that have been splattered with food and unfortunately set to the side.

A pre-rinse mixer boasts strong jets of water able to power-off heavy amounts of food. Its unusually tall and incredibly flexible hose is ideal for reaching around and under large, awkwardly shaped dishes to get into every corner, nook and cranny.

SWIVEL SPOUT

Don't get stuck with a stationary spout if you have multicompartmental sinks or large pots or buckets that need filling. Swivel spouts can move from left to right and work brilliantly for switching from a rinse sink to a washing-up sink. They also work great for larger items that need the space for lifting, where a stationary faucet would just get in the way.

TRADE

IT'S WHAT WE DO!

Our plumbing and bathware after sales service centre is anchored by a dedicated team, comprising of two proficient technicians, whose expertise ensures swift and effective resolutions to any issues our customers encounter. Commitment to excellence and problem solving underpins our reputation for dependable aftercare. With over 2000 spare parts stocked in our Auckland warehouse, we're poised to address any maintenance requirements promptly, minimising downtime and maximising customer satisfaction.

Moreover, our expansive distribution network spans across New Zealand and the South Pacific, enabling us to extend our support and services to customers far and wide. Whether it's a remote island or a bustling city, our reach ensures that assistance is always within arm's reach. Complemented by a guaranteed 24-hour response time for all enquiries, our technical team stands ready to provide unparalleled support, reaffirming our commitment to delivering exceptional service at every turn.

Our extensive range of spare parts, genuine branded products, technical information and trouble shooting advice, is now just a click or swipe away!

ROBERTSONTRADE.CO.NZ

check out our **NEW** website

The image displays a multi-device view of the Robertson Trade website. On the left, a tablet shows the homepage with a prominent banner for 'MEROX CARTRIDGES' (Over 25 million sold per year) and an 'OUTLET STORE' sign. On the right, a desktop view shows a product grid with categories: Wastes & Traps, Angle Stops & Stop Taps, Basin Parts, Toilets & Mixer Parts, Toilet Flats, Shower Enclosure Parts, and Kitchen Parts. A magnified view of the 'Toilets & Mixer Parts' category shows four product listings:

- CARTRIDGE FOR ION BASIN MIXER: \$111.0000 (\$111.00)
- CARTRIDGE FOR ION EXTENDED HEIGHT BASIN MIXER: \$111.0000 (\$111.00)
- CARTRIDGE FOR ELEMENT DIVERTER: \$111.0000 (\$111.00)
- CARTRIDGE FOR ION KITCHEN MIXER: \$111.0000 (\$111.00)

WATER PRESSURE / WELS RATINGS

WHAT'S MY WATER PRESSURE?

When you're choosing a tap or mixer, the most important thing to know is that it's the right one for you and your home, whether yours is a high or low pressure hot water system. Check your water cylinder to see whether it indicates it is low or mains pressure.

MAINS PRESSURE

Mains Pressure Water system means that the cold water and the hot water pressure is high (generally 350-500KPA). When the hot water is fed through a mains pressure hot water cylinder, a Mains Pressure only tap or Multi Pressure tapware can be used. If you are on gas it will be Mains Pressure.

MULTI PRESSURE

An unequal water pressure system means that the cold water pressure is higher than the hot water pressure. In most cases the hot water could be as low as 35-120 KPA and fed through a low pressure hot water cylinder, while the cold water pressure may be 500KPA. This type of pressure system requires a tap suited to Multi Pressure.

HOW DO I KNOW WHICH PRODUCTS ARE MORE WATER EFFICIENT?

The New Zealand Water Efficiency Labelling Scheme (WELS) was introduced on 1 April 2010 and is a government initiative that provides information to help consumers make informed decisions. WELS labels are intended to assist your purchasing decisions, to save you money, and promote water conservation. The WELS rating is indicated by the number of stars displayed; the more stars shown, the more water efficient the product is. The WELS rating also provides information on the average flow rate for products when tested at various pressures.

WELS RATING SYSTEM FOR:

TAPWARE AND SHOWERHEADS

0 Stars

More than 16 litres per minute or failing the performance requirements is rated NOT STAR RATED.

1 Star ★

More than 12 but not more than 16 litres per minute.

2 Stars ★★

More than 9 but not more than 12 litres per minute.

3 Stars ★★★

More than 7.5 but not more than 9 litres per minute.

TAPWARE ONLY

4 Stars ★★★★

More than 6.0 but not more than 7.5 litres per minute.

5 Stars ★★★★★

More than 4.5 but not more than 6 litres per minute.

6 Stars ★★★★★★

More than 3 but not more than 4.5 litres per minute.

TOILETS ONLY

3 Stars ★★★

Allows for a 6 litre large flush and 3 litre half flush.

4 Stars ★★★★

Allows for a 4.5 litre large flush and 3 litre half flush.

SUSTAINABILITY

At Robertson Bathware we care deeply about the planet and about safeguarding our precious natural resources. While we strive to create beautiful, high-quality bathroom products, we also take our responsibility for protecting our environment very seriously. That's why we pledge an ongoing commitment to limit the impact of our activities on the environment, and to provide a safe and healthy workplace for our employees.

Our goal is to integrate sustainable practices into every aspect of our operations; from the design and development of our products, to their production, packaging and distribution. We also educate our employees about sustainable practices they can implement, and seek to work with suppliers and partners who share our environmentally responsible values.

PRODUCT DESIGN

Our product innovations favour not just performance, but the use of clean technologies and features that reduce water consumption, minimise the need for detergents that damage our waterways, and cut down on energy use. We also consider the lifecycle of our products to ensure they incorporate the economic use of resources, are safe and efficient, and are designed to last.

OUR PARTNERS

As far as possible, we look to partner with businesses and source our product range from organisations that share our sustainability values and practices.

PRODUCTION

We carefully consider the efficient use of resources during the manufacture of our products and work to minimise toxic emissions from our plant, and the fleet we use to distribute our products. Robertson Bathware works to minimise waste by continuously evaluating our operations and ensuring that they are as efficient as possible. We participate in recycling to reduce our impact on landfills and promote recovery of valuable resources.

EMPLOYEES

Our staff are trained and informed about the role they play in environmental protection, and in meeting occupational health and safety requirements. We encourage them to recycle, reuse and reduce their waste, both in the workplace and at home.

PRINTING

This item is printed using sustainable paper stock supplied by paper merchants with PEFC™ and FSC® chain of custody accreditation. We use H-UV inks which are environmentally friendly. They contain 0% mineral oils or Volatile Organic compounds.

OUR GUARANTEES

WITHOUT EXCEPTION ROBERTSON PRODUCTS ARE GUARANTEED TO MEET OR EXCEED THE STANDARD REQUIREMENTS FOR THE NEW ZEALAND BUILDING CODE.

RESIDENTIAL

In addition to specific guarantees provided, all products imported and or sold by Robertson are, to the extent applicable, guaranteed in accordance with the Durability Clauses of the New Zealand Building regulations and Consumer Guarantees Act.

Our guarantees apply only to products imported and sold by Robertson. These guarantees do not cover products sold by Robertson under any other agency, company or brand name. As part of our ongoing commitment to continuous improvement, Robertson NZ Ltd reserves the right to make changes to its products at any time.

All guarantees are subject to terms and conditions and available on request or can be viewed at: <https://www.robertson.co.nz/warranties>

The warranty period starts from the purchase date, not the installation date.

The guarantee is against manufacturing defects only.

As this guarantee may not cover the cost of removal or installation, all products must be checked to see they are in good order and condition and fit for the intended purpose prior to installation.

This guarantee does not cover products that have been damaged by misuse, accident or neglect.

This guarantee is applicable to all products installed in domestic residential situations and or light commercial situations such as kitchens, bathrooms and laundries in motels, hotels and retirement villages.

This guarantee does not include commercial situations such as public washrooms and or kitchens and laundries in public buildings, schools, sports centres, gymnasiums and hospitals.

Bathroom vanities installed in commercial situations are not covered under guarantee.

This guarantee does not cover normal wear and tear.

For all Robertson products it is imperative that you only clean with non-aggressive cleaning products and wash off any residue, if your product has a care guide as part of the instructions of use it is important to follow those cleaning instructions, if you are unsure that your household cleaner is appropriate, please contact the After Sales Service Team for advice.

The use of any cleaning products that are not in the instruction care guide or approved by Robertson could void your products warranty.

This warranty is personal to the first end user and is not transferable unless explicitly stated in writing by Robertson to a specific entity.

Each and every warranty claim must be applied for online using the Service Request form and be accompanied by the original proof of purchase and a photo or video showing the defect.

Products must have been installed in accordance with the manufacture instructions and in accordance with local City or Council Standards requirements.

Products must have been maintained in good order and condition and serviced in accordance with manufacturers' recommendations.

Robertson reserves the right to determine any issue or uncertainty in connection with the warranty.

Robertson reserves the right to repair and or replace the defective product and or component at its discretion or nearest equivalent if a product needs to be replaced.

All Warranty covered repair work is to be performed by a Robertson representative and or authorised service agent or plumber who has received an authorisation number to attend the job.

This guarantee does not purport to exclude or limit your rights under the Consumer Guarantees Act which applies to consumers acquiring goods other than "in trade". If you acquired the products "in trade" you agree that the Consumer Guarantees Act does not apply.

When we exchange a product under warranty with a new replacement product then the original warranty period remains as per the original product.

Please contact us for information on product suitable for commercial spaces and our commercial warranty statement.

COMMERCIAL

If any Robertson product is purchased for commercial use or for the purposes of a business, then all of the guarantees and remedies in the Consumer Guarantees Act 1993 are excluded.

For the purposes of this warranty 'Commercial Use' means anything other than Domestic Use, including use in commercial applications in commercial or non-residential premises, public buildings such as schools and sports centres, and in other commercial establishments such as hospitals and restaurants.

The Commercial Use warranty covers this product against manufacturing faults in the construction, material, and assembly of both the finished products and any spare parts. Products and spare parts which are found upon inspection by an authorised Robertson representative to be defective in construction, material or assembly will be repaired or exchanged free of charge.

Replaced items become Robertson's property. The labour for the replacement of products and spare parts to which this warranty applies will be supplied by authorized representative using a licensed plumber.

COMMERCIAL WARRANTY CONDITIONS

This warranty will apply only under all the following conditions:

- The item has been installed by a licensed plumber
- Failure is due to a fault in the manufacture of the product
- Proof of purchase is provided
- The installation of the product is in accordance with the instructions provided This warranty does not cover products purchased as an ex-display without being fully checked and tested for sale by the manufacturer.

This warranty does not include faults caused by:

- Unsuitable or improper use
- Incorrect installation or installation not in accordance with the instructions provided
- Installation or part installation by the purchaser or any person other than a LICENSED PLUMBER
- Normal wear and tear
- Inadequate or complete lack of maintenance
- Chemical, electrochemical, or electrical influences
- Harsh detergents or abrasive cleaners used on product finishes

EXCLUSIONS

To the fullest extent permitted by law, Robertson excludes all liability for damage or injury to any person, damage to any property, and any indirect consequential or other loss or damage.

With respect to the Australian/New Zealand Standard for Water Supply Tapware (AS/NZS 3718:2005 reconfirmed in 2016), Robertson tapware products comply with the Copper Alloy (i.e. Brass) requirements in paragraph 2.2.4 of the Standard. The Lead Content in our tapware is well below the maximum Lead content as defined in the Standard.

Note: *All guarantees are subject to terms and conditions and available on request or can be viewed at: www.robertson.co.nz/warranties
