## MINIMAL TO ORGANIC, FROM RATIONAL TO ARTISTIC

Ceramica Flaminia's choral design project works with artists from different backgrounds who draw their inspiration from different cultures and traditions, giving their own interpretation of ceramics and bathroom design.

As bathroom design trends lean towards mixing different products to create a home that reflects personality, Flaminia partners with designers of great cultural prominence, focusing on an innovative design approach and a highly recognisable style.

Flaminia dedicates much of its energy to the development of solutions that can support and give shape to the creativity of the designers, as well as make it possible to realise highly complex projects. From minimal to organic and rational to artistic, these design styles are built on a feeling for the material and the skills of the company's expert craftsmen.

Ceramics of Italy

## THE SILENT EVOLUTION

GoSilent is the new Flaminia silent flushing system, representing the evolution of 'GoClean' which combines the elimination of the rim with the reduction of noise.

GoSilent Flush makes cleaning the internal parts of the toilet easier and maximises hygiene with every flush. Coupled with better water consumption than original design, but its major innovation is silence. The reduction of noise using GoSilent technology is about 50% quieter compared to the previous GoClean model.
